Changing the landscape
with location intelligence
and data-informed solutions

GIS AT A GLANCE

- Geographic Information System (GIS), in the simplest terms, is digital mapping.
- It is an integration of maps and databases that provides a new platform for information to be collected, stored, analyzed, and presented beyond traditional means.
- New approaches in the application of GIS are integral to solving operative and logistical problems, among others.

WHO WE ARE

Pushpins is a GIS consulting company based in the Philippines. We leverage the power of location intelligence to provide you with relevant solutions that cater to your needs. Through geospatial analysis and clearly visualized data, we aim to assist your business or organization in decision-making so you can improve existing systems and achieve a more competitive advantage.

Our team puts a premium on collaboration, innovation, adaptability, and usability so we can help you reach your goals while fostering a dynamic working relationship.

WHAT WE CAN DO FOR YOU

Desktop, Web, and Mobile Mapping

We offer powerful desktop, web, and mobile mapping solutions visualized in 2D or 3D. This allows you to explore and analyze geographic data in detail wherever you are—whether you're at your desk, on the web, or on the move.

GIS Consultation

We can help you reassess your existing policies, develop alternative schemes, enhance your capabilities, and optimize the utilization of integrated GIS within your organization for a smoother workflow.

GIS Augmentation

Pushpins can serve as a remote or co-located extension of your organization and fill in your geospatial requirements. Consider us your reinforcement when it comes to project-based tasks that are not within the scope of your in-house team's skill set.
